Preface X

Contents XV

List of Contributors XIX

List of Reviewers XXIII

Part I Applications in Remote Sensing

1. Multispectral Remote Sensing Image Classification Using Wavelet Based Features
Saroj K. Meher, Bhavan Uma Shankar and Ashish Ghosh
1 Introduction 3
2 Wavelet transformation based feature extraction 7
3 Classification techniques 14
4 Performance measurement index 20
5 Results and discussion 21
6 Conclusion 29
References 30

2. Images with Uncertainty: Efficient Algorithms for Shift, Rotation, Scaling, and Registration, and Their Applications to Geosciences
Cara G. Schiek, Roberto Araiza, Jose Manuel Hurtado, Aaron A. Velasco, Vladik Kreinovich, Victor Sinyansky
1 General motivation and goals of the chapter 35
2 Structure of the chapter 36
3 Registering images known with high accuracy 36
4 Images known with low accuracy: case study 48
5 How to extend the existing image registration techniques to images known with low accuracy 53
6 Results of applying the new image registration algorithm 56
7 Conclusions and future work 56
References 59

3. Neural Networks in Multiple Classifier Systems for Remote-Sensing Image Classification
Moumen T. El-Melegy, Safaa M. Ahmed
1 Introduction . . . 65
2 The problem . . . 69
3 Neural classifiers . . . 70
4 Neural decision fusion . . . 74
5 Classifier selection using neural networks . . . 75
6 Selection and fusion using neural networks . . . 77
7 Experimental results . . . 78
8 Conclusions . . . 89
References . . . 91

Part II Applications in Image Retrieval

4. Linguistic Expression Based Image Description Framework and its Application to Image Retrieval
Qingyong Li, Zhiping Shi, Zhongzhi Shi
1 Introduction . . . 97
2 Related work . . . 98
3 Linguistic expression based image description framework . . . 101
4 Application in texture image retrieval . . . 107
5 Discussion . . . 115
6 Conclusion . . . 117
References . . . 118

5. Focusing Keywords to Automatically Extracted Image Segments Using Self-Organising Maps
Ville Viitaniemi, Jorma Laaksonen
1 Introduction . . . 121
2 Background . . . 122
3 Image content analysis . . . 123
4 Image segmentation for image content analysis . . . 126
5 Focusing keywords in image segments . . . 130
6 System implementation . . . 133
7 Experiments . . . 140
8 Conclusions and future views . . . 150
References . . . 151

Part III Applications in Image Analysis

6. A Fuzzy Edge-Dependent Interpolation Algorithm
Piedad Brox, Iluminada Baturone, Santiago Sánchez-Solano
1 Introduction . . . 157
2 Fuzzy-ELA algorithm . . . 158
3 De-interlacing . . . 167
4 Image enlargement . . . 175
5 Hardware implementation . . . 181
6 Conclusions . . . 183
References . . . 183

7. Fuzzy Image Segmentation Based on Triangular Function and Its n-dimensional Extension
Vasile Pătraşcu
1 Introduction . . . 187
2 The triangular function and its n-dimensional extension . . . 188
3 The fuzzy clustering algorithms . . . 192
4 The color systems IJK and ISH . . . 195
5 The fuzzy image segmentation methods . . . 199
6 Conclusions . . . 206
References . . . 206

8. Application of Neuro-Fuzzy Methods for Noise Filtering, Noise Detection and Edge Extraction in Digital Images Corrupted by Impulse Noise
Emin Yüksel
1 Introduction . . . 209
2 Literature review . . . 210
3 The neuro-fuzzy operator . . . 214
4 Applications . . . 220
5 Conclusions and remarks . . . 231
6 Acknowledgement . . . 231
References . . . 232

Part IV Other Applications

9. Creating Photorealistic Models by Data Fusion with Genetic Algorithms
Dmitry Chetverikov, Zsolt Jankó, Evgeny Lomonosov, Aniko Ekárt
1 Introduction . . . 239
2 Pre-registration of surfaces using a genetic algorithm . . . 242
3 Fusion of surface and image data . . . 246
4 Tests . . . 257
5 Conclusion . . . 263
References . . . 263

10. The Use of Fuzzy Information Granular for Content Representation of Video Sequences
Congyan Lang, De Xu, Jiehua Yu
1 Introduction . . . 267
2 System overview . . . 270
3 Pre-processing . . . 271
4 Salient region extraction based on fuzzy information granular . . . 272
5 Applications . . . 284
6 Conclusions . . . 292
References . . . 293

11. Wavelets and Fuzzy Contours in 3D-CAD for Digital Breast Tomosynthesis
Gero Peters, Serge Muller, Sylvain Bernard, Isabelle Bloch
1 Introduction . . . 296
2 Context . . . 297
3 Candidate particle detection using wavelets . . . 301
4 Fuzzy contours and fuzzy measurements . . . 307
5 Partial defuzzification . . . 313
6 Aggregation . . . 315
7 3D processing . . . 317
8 Results . . . 319
9 Conclusion . . . 322
References . . . 323

12. Intelligent Biometric Information Fusion using Support Vector Machine
Richa Singh, Mayank Vatsa, Afzel Noore
1 Introduction . . . 327
2 Face recognition using phase and amplitude features . . . 328
3 Overview of support vector machine . . . 331
4 Information fusion in face biometrics . . . 336
5 Experimental results . . . 341
6 Summary . . . 348
7 Acknowledgment . . . 348
References . . . 349

Part V Theoretical Contributions

13. General Definition of Fuzzy Mathematical Morphology Operations
Antony T. Popov
1 Introduction . . . 355
2 Binary mathematical morphology and the abstract lattice theory . . . 356
3 Fuzzy morphological operations . . . 361

4 T-invariant fuzzy morphological operations 364
5 Fuzzy geodesic morphological operations 366
6 Computations with intervals and fuzzy numbers 368
7 Fuzzy mathematical morphological operations for colour images 372
8 Morphological operations and an efficient way to compute fractal dimension 378
References 381

14. Intuitionistic Fuzzy Image Processing
Ioannis K. Vlachos, George D. Sergiadis
1 Introduction 385
2 Elements of intuitionistic fuzzy sets theory 386
3 Towards intuitionistic fuzzy image processing 389
4 The intuitionistic fuzzy image processing framework 394
5 Intuitionistic fuzzy histogram hyperbolization 400
6 Intuitionistic fuzzy contrast intensification 403
7 Edge detection driven by hesitancy 409
8 Conclusions 413
References 414

15. Integer Programming Methods in Image Processing and Bayes Estimation
Boris A. Zalesky
1 Introduction 417
2 Image processing as discrete optimization problem 419
3 Multiresolution network flow minimum cut algorithm 421
4 Integer minimization of $U_{mod,\mathbf{f}}(\mathbf{m})$ and $U_{sec,\mathbf{f}}(\mathbf{m})$ 427
5 Combinatorial minimization of submodular functions 433
6 Representability of some submodular polynomials by graphs 442
7 Conclusion 446
References 446

16. Colour Quantisation by Black-box Optimisation
Gerald Schaefer, Lars Nolle
1 Introduction 449
2 Simulated annealing 450
3 Simulated annealing for colour quantisation 453
4 A hybrid approach to colour quantisation 454
5 Experimental results 455
6 Conclusions 466
References 466

Appendix Colour Images
